Fall Color:	yellow-brown
Flowers:	insignificant
Fruit:	acorn
Zone:	4

DESCRIPTION

Regal Prince[®] is one of the best columnar oaks! A cross of *Quercus robur* 'Fastigiata' x *Quercus bicolor*, exhibiting a strong upright, columnar habit that remains tight as it matures. It is a vigorous, strong tree, and is adaptable to many unfavorable climactic and soil conditions. The dark green foliage is somewhat shiny on the upper surface, and has good substance, making it highly resistant to both leaf tatter and mildew.

Regal Prince[®] is an excellent choice for formal gardens, and as a single specimen tree.
