DESCRIPTION

Diervilla is a durable shrub with a mounded, spreading habit. It suckers freely but generally does not get out of bounds. It grows well in moist, well-drained soils, but is adaptable to various soil types, exposure, and adverse climactic conditions.

Cool Splash® is showy! Its brightly variegated foliage makes it a standout in the landscape. Small yellow flowers are borne in late spring to early summer.

The suckering habit of this shrub makes it good for planting on banks or slopes. Its variegated foliage with lighten naturalized settings and shrub borders.
