Height:	4-5'
Spread:	4-5'
Shape:	broad, rounded
Foliage:	green
Fall Color:	insignificant
Flowers:	peach-pink
Fruit:	pome
Zone:	4

DESCRIPTION

Broad, rounded shrub with an extremely dense arrangement of spiny branches. Fully double, peachy-pink colored flowers are produced in spring, a little later than other cultivars. Blooming branches are showy and excellent for cutting. Flowers are followed by large fruit (quince) which may be used to make preserves and jellies.

The dense habit and spiny branches of this shrub makes it perfect for barrier plantings and hedging. Nice flower effect when planted in groups.
