SPECS

Height:	20-25'
Spread:	20'
Shape:	upright, spreading
Foliage:	green
Fall Color:	red-purple
Flowers:	pink
Fruit:	red drupe
Zone:	5

DESCRIPTION

Stellar Pink™ is one of a series of flowering dogwood developed by Rutgers University, bred for improved vigor and superior resistance to Anthracnose and powdery mildew.

This cultivar has large, overlapping bracts that are soft pink. The dark green foliage is clean throughout the growing season and develops a deep red-purple color in fall. Small red fruits add ornamental interest in early winter.
