| Foliage: | green |
| Fall Color: | yellow |
| Flowers: | deep pink |
| Fruit: | capsule |
| Zone: | 5 |

DESCRIPTION

'Pink Delight' is a dense shrub with an upright habit. Its panicles of mildly fragrant rich pink flowers are huge, often well over 12" in length, and are produced with abundance over a long period in summer.

Butterfly Bush is great for attracting butterflies and hummingbirds to the garden. The larger size of this cultivar makes it perfect for shrub borders, and as a background planting in perennial gardens.
