Coreopsis (Tickseed) are a popular perennial blooming all summer in a variety of colors. Grown best in full sun with well-drained soils. Planting in heavy clay soils can impact their survivability. They are grouped into two distinctive types: grandifloras, which have wide leaves, and verticillatas, have narrow, thread-leaf foliage.

Grandiflora Types:

Grandifloras have wider, green foliage and bloom from early summer to the first frost.
