Flowers:	white
Fruit:	drupe
Zone:	5

DESCRIPTION

Cornus florida, or Flowering Dogwood, is an excellent small tree for gardens! Their colorful bracts in early spring are long lasting, and most exhibit wonderful fall color. Provide this Dogwood type with organic, acidic, well-drained soils in partial shade. Full sun sites will need adequate moisture during the summer months.

'Cherokee Princess' has an upright habit with an oval crown. It is an extremely vigorous grower, with a heavy crop of white flowers early in spring. Small red fruits and red fall color add additional interest.

Plant in groupings, as a single specimen, or in woodland and naturalized gardens.
