| Flowers:    | catkins           |
| Fruit:      | nutlet            |
| Zone:       | 3                 |

## DESCRIPTION

Developed by NDSU, Dakota Pinnacle® is an extremely hardy White Birch which also has good drought tolerance. It exhibits above average resistance to bronze birch borer and is tolerant of both strong winds and urban environments.

Dakota Pinnacle® was selected for its columnar to narrowly pyramidal habit. Its dark green foliage turns golden yellow in fall, and is retained over a long period. Adding to the overall appeal of this tree is its smooth white bark, which is extremely showy. Provide supplemental water in extreme summer heat.

Utilize this tree as a vertical accent, or in smaller areas.
