

Forest Pansy Redbud

Cercis canadensis 'Forest Pansy' PP2,556

SPECS

Height:	20'
Spread:	25-30'
Shape:	spreading
Foliage:	purple-bronze
Fall Color:	yellow-orange
Flowers:	rose-purple
Fruit:	pod
Zone:	5

DESCRIPTION

'Forest Pansy' is a beautiful tree with a wide, horizontally spreading habit. Loads of rosy-purple flowers are produced along its bare branches in early spring. Its leaves emerge a shiny red-purple color, mellowing to a bronzy-green during the heat of summer.

The combination of form, flower and color of 'Forest Pansy' make it a striking specimen. Planting in full sun will bring out the best leaf color but be sure to provide supplemental moisture during hot summer periods.
