

The Rising Sun™ Redbud

Cercis canadensis 'JN2' PP21,451

SPECS

Height:	12'
Spread:	15'
Shape:	spreading, vase
Foliage:	golden-peach
Fall Color:	yellow
Flowers:	rose-pink
Fruit:	pod
Zone:	4

DESCRIPTION

The amazing leaf colors of The Rising Sun™ will light up the landscape all season! Bright rosy-apricot new growth matures to a myriad of colors that range from chartreuse, gold, peach and apricot tones. Foliage color sustains much of the season and does not scorch in summer heat. Rosy-pink flowers are borne on bare branches in early spring, and interest is extended into winter with its tan bark that has a distinct yellowish cast. The Rising Sun™ grows well in full sun and is quite drought tolerant.

Plant as a single specimen or in borders. Enjoy its colorful display by planting near windows or patios and decks.
