Height:	3-5'
Spread:	3-5'
Shape:	mounded, arching
Foliage:	green
Fall Color:	yellow
Flowers:	mauve-blue
Fruit:	capsule
Zone:	5

DESCRIPTION

A compact Butterfly Bush with slender branches and small blue-green leaves. 4-6" panicles of mauve-blue flowers cover the plant and are mildly fragrant. Deadheading will prolong flowering for color during most of the summer months.

Butterfly Bush is great for attracting butterflies and hummingbirds to the garden. The dwarf stature of this cultivar makes it easy to integrate in smaller areas. Plant within shrub borders and perennial gardens.
