Flowers:	white
Fruit:	follicles
Zone:	3

DESCRIPTION

Ninebark is easy to grow and adapts well to many tough conditions. They produce small button-type flowers in late spring, but their colorful foliage and exfoliating bark are its primary ornamental assets.

Amber Jubilee™ displays a multitude of stunning colors! New growth glows with gold, orange and red tones. Mature foliage is lime green, providing nice contrast to the colorful emerging leaves. Rich red and purple tones take over in fall.

Plant Amber Jubilee™ as a colorful hedge, in groupings, or integrated into shrub borders.
