SPECS

Height: 8-10'
Spread: 6-8'
Shape: upright, rounded
Foliage: purple
Fall Color: yellow-bronze
Flowers: pinkish-white
Fruit: follicles
Zone: 3

DESCRIPTION

Ninebark is easy to grow and adapts well to many tough conditions. They produce small button-type flowers in late spring, but their colorful foliage and exfoliating bark are its primary ornamental assets.

'Center Glow' is a large rounded shrub with deep burgundy foliage. The new growth is a bright yellow-green, providing a unique and colorful contrast to the mature foliage throughout the growing season. 'Center Glow' may also be grown tree form, where its exfoliating bark can be better appreciated.
