Fruit:	capsule
Zone:	5

DESCRIPTION

Part of the Proven Winners® English Butterfly™ series, which were developed to have a compact habit, dense form and large, abundant flowers.

Adonis Blue™ displays long panicles of fragrant, deep blue-purple flowers in summer.

Butterfly Bush is great for attracting butterflies and hummingbirds to the garden. The compact size of this cultivar makes it perfect for smaller spaces in perennial gardens and shrub borders. Its prolific blooms makes it an ideal choice for large containers, to be planted into the garden at seasons' end.
