Flowers:	white
Fruit:	pome
Zone:	3

DESCRIPTION

Black Chokeberry is a rounded, suckering shrub that adapts well to various soils and exposure. Best growth occurs with moist soil in partial shade.

'Autumn Magics' distinguishing attributes occur in autumn, with its larger clusters of black fruit and spectacular fall color. Fruits persist through winter, providing an additional season of interest.

This shrub looks best when massed. Plant it within shrub borders, foundation plantings, as a background plant, or near ponds and streams.
