Fall Color:	evergreen
Flowers:	insignificant
Fruit:	cone
Zone:	4

DESCRIPTION

Emerald Green Arborvitae is a landscape staple. It has a dense, narrowly upright form, with glossy, dark green sprays of foliage. Foliage remains attractive throughout the winter months, retaining its dark green tone without discoloring.

This useful plant is versatile and easy to integrate within the landscape. Use it for windbreaks and natural screens, in groupings, in the tree and shrub border, or anywhere a reliable evergreen is desired.
